

Board of Health Press Release - 3/31/2020

The State Department of Public Health, and Governor Baker have extended the closure of non-essential businesses through May 4th, 2020. Further testing continues to become available, leading to a surge in confirmed positives across the state of Massachusetts. At this time, the Stoneham Board of Health will be providing a case count for the Town, and will update said count every Tuesday by 5pm moving forward. We continue to implore residents to practice efficient and proper social distancing at this time, as the Board of Health continues to receive reports regarding congregation and group activities on public fields. As stated on 3/30/2020, continued reports regarding this behavior will lead to the closure of these fields and other areas.

*****A Message from the Stoneham Senior Center*****

It is up to each of us to keep our community safe and strong and we spend some time #alonetogether. If you have elderly neighbors that you have not seen recently, please give them a call to make sure they have everything they need. They might be too proud or private to ask for help, or they may not know that help is available. Please call the Senior Center at 781-438-1157 Monday through Thursday if a senior that you know is in need of help during this time. We can provide a box of household essentials, referrals to other services that they need.

Thank you and take care!!
