

HOW WILL WE DO THIS?

MSBA Core Program Process Overview

This is the process which the Stoneham School Building Committee will follow.

WHY IS THIS IMPORTANT NOW?

The current Stoneham High School building, while compliant with building codes, has some accessibility challenges.

Classrooms and labs are outdated and inflexible.

The building is energy inefficient and expensive to operate — temperature controls are a challenge in all seasons due to outdated mechanical systems.

Technology, which plays a significant role every day in learning and is an ongoing challenge as students, faculty and administrators use electronic devices for more and more of their daily work.

A new high school would be eco-friendly, environmentally sustainable and energy efficient, creating real savings for Stoneham and its taxpayers.

HOW CAN YOU HELP?

Over the coming months, the SSBC will be seeking input from residents, businesses and local organizations regarding the design features a new or renovated building should/could have. Attending the regularly scheduled meetings of the SSBC provides an opportunity for you to have direct input in this area.

WHO ARE WE?

The Stoneham School Building Committee (SSBC) is comprised of municipal employees from the School and Town departments, elected representatives from the Select Board, School Committee and Finance & Advisory Board and citizens with a variety of talents and skills suited to the work of bringing a 21st century high school to the students and community of Stoneham.

WORKING TOGETHER WE CAN GIVE OUR COMMUNITY THE HIGH SCHOOL OUR CHILDREN DESERVE!
